The Experiment in International Living

Dacca, Mast Pakistan December 18, 1961

Seasons greetings from under a barana tree, the closest thing we have to a Christmas tree.

I want you to know that I am thinking of you during this holicay season, even though it is not observed in this corner of the world. I will spend my holiday on Saint Wartian's Island, a small isolated island off the coast of Burma in the Bay of Bengal. This is part of my job-filming for a scientific expedition leaving here on the twentieth of December to study reology, marine biology and the island's population of 869.

Lack of time limits me to just these few short paragraphs; however, more news will be forthcoming in the near future, through the kindness of the Experiment in International Living, which is providing this service.

Sishing you many happy days in the new year.

Bill Guth
